

Path to COVID-19 vaccination

Individuals 12 and older

For questions about the vaccine or to schedule an appointment, please call our vaccine line at 1.844.BSW.VACC.

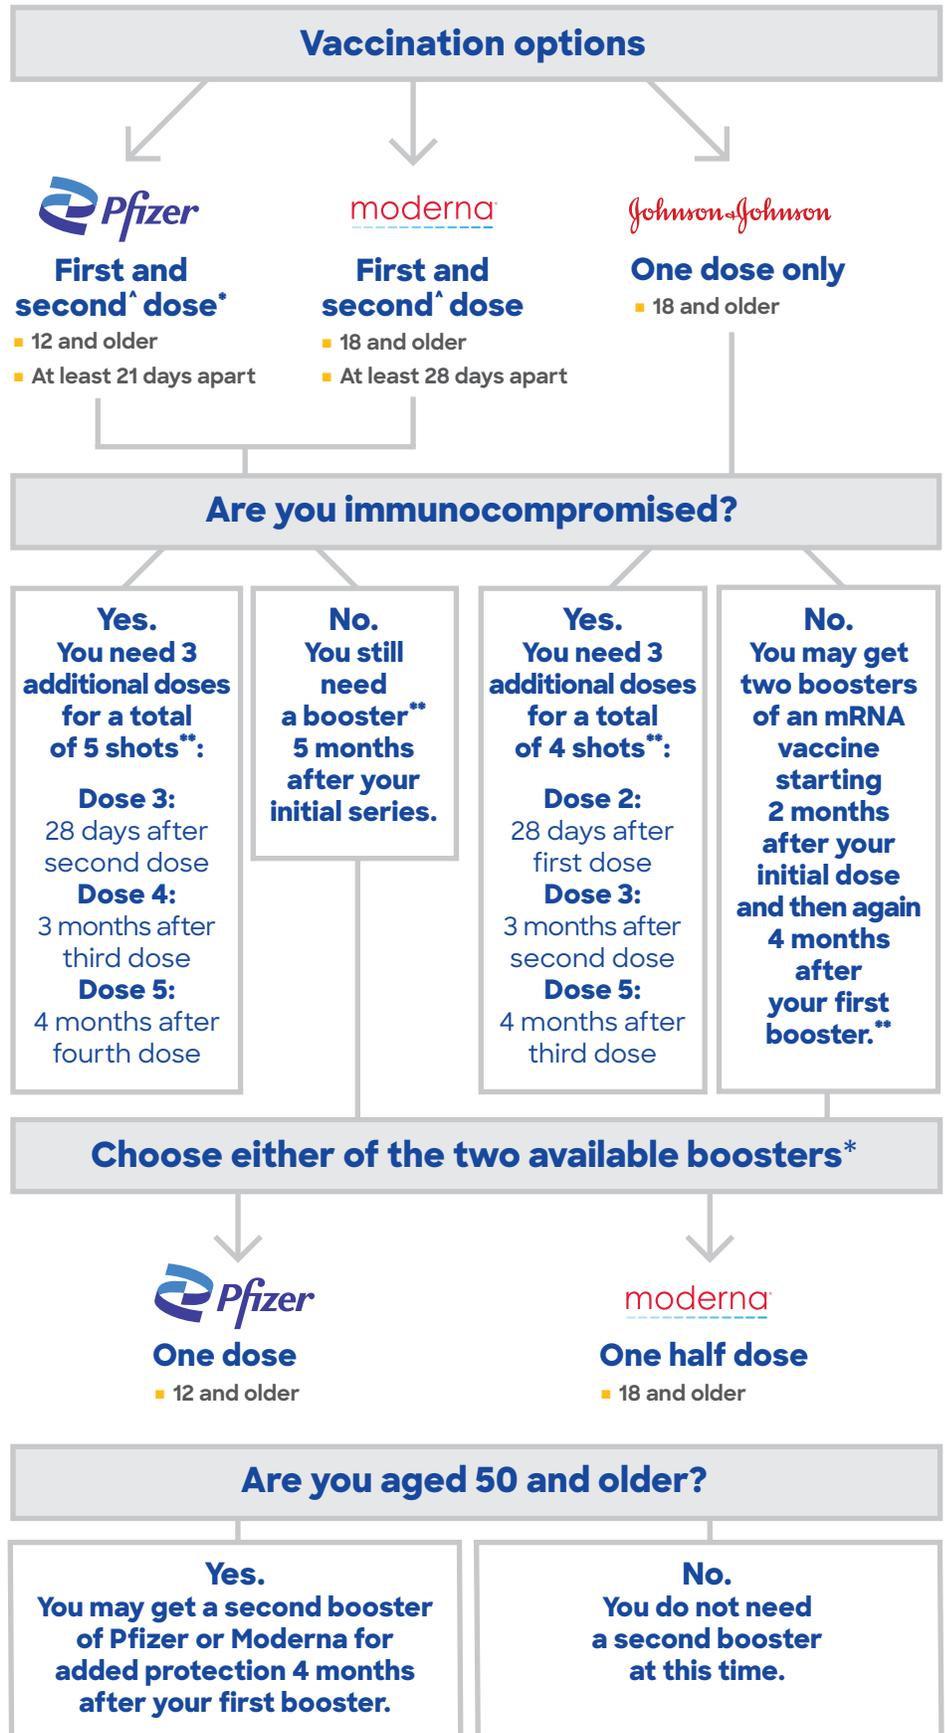

You can also schedule an appointment on [MyBSWHealth.com](https://www.mybswhealth.com) or on the [MyBSWHealth app](#).

Note: The CDC now recommends only receiving mRNA vaccines for additional doses or a booster (Pfizer and Moderna).

*The Pfizer vaccine is currently the only available option for those ages 12 to 17.

**A person is considered fully vaccinated after the primary series. However, you are considered up to date on your vaccinations if you receive a booster.

^An 8-week interval may be optimal for some people ages 12 years and older, especially for males ages 12 to 39 years. A shorter interval (3 weeks for Pfizer-BioNTech; 4 weeks for Moderna) between the first and second doses remains the recommended interval for: people who are moderately or severely immunocompromised; adults ages 65 years and older; and others who need rapid protection due to increased concern about community transmission or risk of severe disease.

Path to COVID-19 vaccination

Ages 5-11

For questions about the vaccine or to schedule an appointment, please call our vaccine line at 1.844.BSW.VACC.

You can also schedule an appointment on [MyBSWHealth.com](https://www.mybswhealth.com) or on the MyBSWHealth app.

* The Pfizer vaccine is currently the only available option for those ages 5 to 11.

If the minor has a birthday in between doses, the dose given would be the dose appropriate for the age they are at the time of the dose.
